BRIDGING WELLNESS WITH MODERN TECHNOLOGY & MEDICINE

New markets and economies are rapidly emerging in the health and wellness arena and **Blue Health and Wellness Center, LLC (Blue Health)** and its investors are poised advantageously for success with the developing opportunity and revenue stream and business in Michigan that are on the cusp advantage of this healthcare economic opportunity.

Over 20 states, including Washington D.C., have made progress on their Medical Cannabis and Hemp programs. Colorado, Oregon and Washington have already begun to take advantage of the additional economic growth of recreational programs. These programs will create over $100 million for the individual states that participate in these tax generation methodologies over the next ten years. These markets nationwide are currently valued at more than $7 billion, with the Hemp market already worth approximately $500 million.

Blue Health's business design, model and profit center encompasses all aspects of these programs vertically integrated in the entire seed to sale process.

This process is a primary 'seed to sale' business model of:

- Education
- Research
- Manufacturing
- Testing
- Clinical trials
- Distribution
- Cultivation
- Quality Control
- Production
- Observational Trials
- Patents
- Consulting

Each of these aspects contains their own cash flow models and operational

The purpose of these programs is to create hundreds of millions of dollars, if not billions, in tax revenues for the State of Michigan.
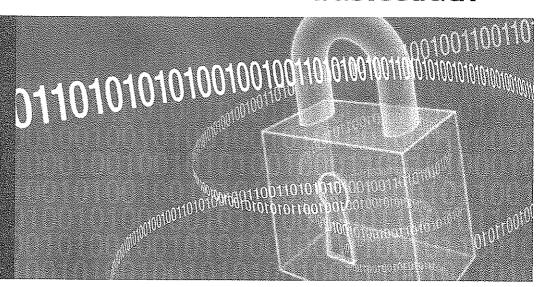

procedures.

Blue Health has engineered a superior model for implementation within the State of Michigan, of all opportunities and aspects of the seed to sale market process, which consistently achieves the highest standards of quality, in a fully and legally compliant manner, while creating multiple benefits across the economic, political, cultural, and social systems.

Blue Health, headquartered in southeast Michigan, has an exemplary network of industry leaders, business resources, and top consultants in the business at their fingertips. Our model exceeds industry standards for commercial, industrial, and agricultural production by exceeding Food and Drug Administration (FDA) and Current Good Manufacturing Practices (cGMP) quality.

We provide a compliance platform for seed to sale programs

Trusted Track™ enables the delivery of a seed to sale system over a highly managed platform.

Trusted Track. We demonstrate compliance.

XO Limited provides effective regulatory and enforcement systems to control marijuana cultivation and distribution initiatives. Leveraging our platform, States can access a single source of appropriate data for law enforcement and regulators to access in real time. XO offers a secure solution for State's that need diversion controls and HIPAA compliance. Let XO be your partner to scale and grow your software solution and respond to States' ever-changing needs.

Trust is hard to earn. It's even harder to verify.

Many solution providers say you can trust there IT systems and cloud offerings, but can you demonstrate HIPAA and IT compliance? Our trusted tracking is a purpose-built platform that enables you to trust and leverage the benefits of cloud computing. Simultaneously, our products and solutions demonstrate compliance to both internal and external auditors by unifying compliance. XO offers States Compliance-as-a-Service sought by highly regulated institutions.

Compliance and governance at the core.

For us, compliance isn't an event; it's a process. We blend compliance into every solution we architect. Our Trusted Tracking solution is delivered from our trusted cloud environment allowing us to seamlessly integrate your State requirements for Diversion, Risk and Compliance. Trusted Tracking is a compliant solution leveraging the power of the cloud with trust that you can demonstrate.
